A page for a bubble math activity. At the bottom, a cartoon girl with blonde hair is blowing bubbles. She holds a wand with a red and white striped cord. Several bubbles are shown around her, some containing numbers or mathematical expressions. The page is scattered with large circles, each containing a number or an equation. To the right, there is a large octagonal shape divided into eight triangles, each containing a multiplication problem. There are also several small empty circles scattered across the page for the student to create bubbles.

Mathematical expressions in bubbles:
