

zad. 5 / 80 (p)

• 6000

$$8 \text{ mm} \cdot 6000 = 48000 \text{ mm} =$$
$$= (48 \text{ m})$$

$$15 \text{ mm} \cdot 6000 = 90000 \text{ mm} =$$
$$= (90 \text{ m})$$

$$P = 48 \text{ m} \cdot 90 \text{ m} =$$
$$= (4320 \text{ m}^2)$$

odp.: skwer zajmuje 4320 m^2 .

CZY MOŻNA TAK?

$$8 \text{ mm} \cdot 15 \text{ mm} = 120 \text{ mm}^2$$

$$120 \text{ mm}^2 \cdot 6000 = 720000 \text{ mm}^2 =$$

m^2
